

CritiCare™

Infant CPR and Airway Obstruction Manikin

Introduction:

The CritiCare™ Infant CPR Manikin with Airway Obstruction feature is an extremely cost-effective and durable little trainer that meets Be Safe Paramedical's stringent quality standards.

The trainer is manufactured from an advanced material approach. The hands and feet are made from advanced thermoplastic moulded glue; the head, neck, chin and trunk are made from advanced ABS material.

This combination of materials allows for a realistic experience when performing CPR or airway obstruction techniques. It also promotes excellent durability demanded of CPR manikins which are used extensively.

Features:

- Excellent quality materials
- Easy to disinfect
- Spares cost-effective and readily available
- Simulates airways obstruction
- Perform realistic chest compressions and ventilation
- **Supplied with:**
 - o CPR Mask
 - o 15 x airway obstruction devices
 - o 2 Spare lungs
