

CritiCare® AmpPAC Micro Drug Bag

Product Code: REF:BAG.AMP.M.D

The AmpPAC, as the name suggests, is effectively an ampoule holder, with space in the centre insert for a small number of syringes and needles. We have opted to insulate the AmpPAC with material similar to that found in cooler bags. All you need to do is add a small ice brick and the contents of the AmpPAC will remain cool and protected from hot ambient temperatures often encountered when hikers and climbers are active during the summer months. We also went with elasticised strips to hold ampoules in place, with the idea being to maximise use of the rather compact space available. Now the AmpPAC is not like any of our regular Drug Bags, it was designed to be small, holding up to around 40 ampoules only. You therefore need to look at stocking it with a range of drugs that would commonly be used on the types of calls you would expect in mountainous/remote areas. We have also allocated a small amount of space to hold larger ampoules (5 to 20ml).

Features:

- Manufactured from high quality 420D Nylon
- YKK Zipper
- The AmpPAC is lined with Silver Foil Aerothene which offers good insulation properties and shock absorption characteristics, UV and chemical resistance and its closed cell structure ensures water and dust resistance.
- The AmpPAC is able to accommodate up to 40 ampoules of up to 5ml and several larger ampoules, up to 20ml.
- Central divider for storage of syringes and needles

Dimensions:

- 24 x 17 x 6cm
- 230g
