

# Extrication Device

Product Code: REF: CED.CHILD

Motor vehicle accidents provide a significant mechanism of injury that can affect both the vertebra and spinal cord. As a result, effective immobilisation should be achieved prior to extrication from the vehicle. Given the fact that motor vehicles are being built smaller, extrication is usually very confined.

Extrication devices are available in various shapes and sizes and our design have been around for many years and have been used extensively in EMS. A high quality, easy to apply and durable extrication device.

## Features:

- Manufactured from heavy duty vinyl coated nylon
- Built in handles
- Colour-coded, sewn-in securing straps and snap lock buckles for quick and easy application
- Includes wrap-around vest, adjustable padded neck roll, two head straps and carrying case
- Multiple size adjustable

## Dimensions:

- 78 x 69 x 1 cm
- 1.55 kg

## Standards Compliance:

- ISO 9001:2015
- ISO 13485:2016

**Be Safe Paramedical cc South Africa**
