“Progress Saves Lives...”

Edition 69 | July 2024

## From the Editor's Desk

Greetings friends, clients and fellow healthcare professionals, welcome to the July edition of The Responder.

I cannot believe July is upon us. It felt just like yesterday, when I was sitting down to write the June edition of The Responder. I can tell July is upon us, just by checking the weather. It has gotten freezing in Cape Town. I find myself sitting in a sweater and jacket for most of the day. My colleagues from our Johannesburg branch seem to feel that I have no idea what cold really is. Perhaps I have been spoilt living in Cape Town for all my life, for many reasons and not just the weather. It's okay, I'll live with my choice, thank very much.

It has been a rather interesting month as far as new products go. We are always on the lookout for products to make your lives just a little easier as you go about your calling of saving lives. One of the new products we have just ordered stock of, is our Universal EMS Shears. I am pretty excited about this product because it will definitely make your lives a little easier out on the road. It has 6 different functions incorporated in to one tough little design. It has a Carbide Glass Breaker, Oxygen Tank Wrench, Ring Cutter, 5cm Ruler, Strap Cutter and a 420HC Stainless Steel Folding Medical Shears. Now that is a lot of functionality in one very compact little unit. It will be available in black, blue, orange and red and so it covers all the colour preferences you may have. We will post on our social media pages as soon as our stock arrives, so keep an eye out for it. It is going to be awesome.

Another new product we hope to be launching soon is the i6 Pro Cardiac Monitor Defibrillator. This is also a product I am really excited about. It ticks all the boxes in being able to deliver a full specification machine at a really competitive price. Have a read through our product showcase column in this edition to find out more about the i6 Pro and what it has to offer.

June was also a rather sad month for us, as we had to say goodbye to a staff member who has been with Be Safe Paramedical since it started operating in 1993. Holiday Bonani was a part of our business culture from the very beginning and there is no doubt that he will be missed by all our staff across the country. Holiday decided that it was time for him to retire to the Eastern Cape, where he will be farming livestock and enjoying a well-earned break. Good luck Holiday, you will be missed by us all.

As always, we have some great specials lined up for you, so you will definitely want to check them out for some great savings.

With that said, we hope you enjoy this edition of The Responder.

Yours in Healthcare

*Gravin Sutton*

Edition 69 | July 2024

## New Product launch

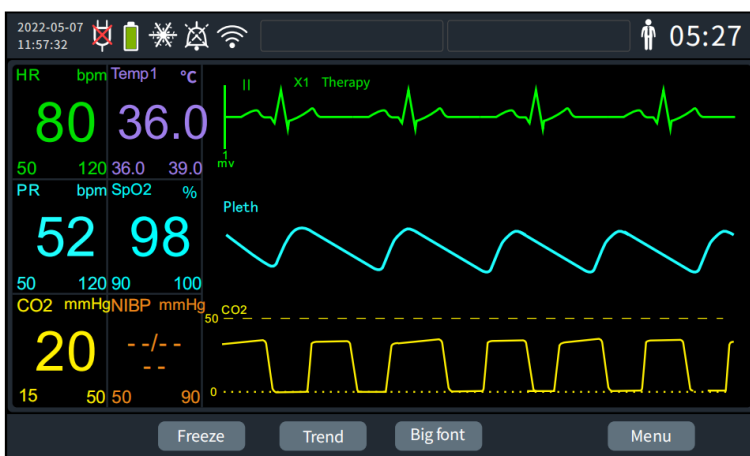

### i6 Pro Cardiac Monitor Defibrillator

Be Safe Paramedical is really excited to introduce you to the new i6 Pro Cardiac Monitor Defibrillator from Amouf. If you are shopping around for a new defibrillator, then this extremely compact and lightweight Cardiac Monitor Defibrillator, jam-packed with monitoring capabilities, is definitely worth a closer look.

Given its advanced monitoring capabilities, the i6 Pro is aimed at the Advanced Life Support Provider and you will find all the specifications you require to adequacy care for and monitor the critical care patient. The i6 Pro is equally suited for use in EMS, the ICU and Emergency Centre.

Looking at the external structure of the machine, you will notice several things. The i6 Pro has a 7" colour LCD screen that offers a user-friendly and intuitive interface. Vital signs numerics are located to the left of the screen, while graphs and curves are located to the right of the screen. All parameters are highly visible from all angles.

Tucked away neatly on top of the machine are the integrated adult/ paediatric defibrillation paddles. The paddles plug can be interchanged with AED/pacing pads when used in these modes. The i6 Pro offers AED, Defibrillation, External Pacing and Monitoring modes. These can be selected quickly by turning the large mode dial.

Another great feature on the i6 Pro is that the rechargeable battery can be interchanged with a fresh battery in a matter of seconds. All you do is pull the battery lock clip and slide the battery out. This means that you can have several batteries as back-up and you will always be guaranteed of a 100% functional machine.

Another feature that is really convenient, is the integrated stretcher hooks located at the rear of the machine. Securing a defibrillator on a stretcher can be a challenge especially in emergency conditions, but with the i6 Pro, this has been cleverly solved with the addition of the stretcher hooks. The hooks fold inward when not in use, so there is no need to be concerned that they will snag on anything when moving the machine around.

*"Progress Saves Lives..."*

Edition 69 | July 2024

The i6 Pro offers the following monitoring parameters, 12 Lead ECG acquisition, Non-invasive Blood Pressure, Pulse Oximetry, Mainstream End-tidal CO<sub>2</sub> and Two Channel Temperature. You will agree that this covers all parameters required by modern Emergency Medical Services.

Let's take a closer look at the i6 Pro's specifications:

## General:

Size: 320 x 200 x 120mm  
Weight: 5.2kg  
Power Source: AC: 100 – 240V, 50/ 60Hz Battery: rechargeable lithium-ion battery pack

## Defibrillator:

Waveform: Biphasic truncated exponential waveform (BTE) with impedance compensation  
Impedance Range: 25  $\Omega$  – 200  $\Omega$  (external defibrillation)  
Energy Selections: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 15, 20, 30, 50, 70, 100, 150, 170, 200, 300, and 360J  
Charge Time: Reach 200J in less than 5 seconds with new fully charge battery  
Reach 360J in less than 8 seconds with new fully charged battery  
Modes: Manual Mode, asynchronous and synchronous defibrillation, and AED Mode

## Non-invasive Pacing:

Modes: Fixed and on-demand mode  
Waveform: Monophasic square wave pulse  
Pulse: Rate: 40ppm – 170ppm  $\pm$ 1.5%, Current 0mA – 200mA  $\pm$ 5% Or  $\pm$ 5mA, whichever is the greater

## Monitoring

Monitoring Parameters: 12 Lead ECG, SpO<sub>2</sub>, non-invasive blood pressure, respiration, EtCO<sub>2</sub>, temperature and events

## Network Solution:

Standards: Wired and 5G wireless Networks

That's the i6 Pro in a nutshell. Should you be interested in finding out more about this fantastic little unit or would like a quotation, please feel free to drop us a mail at [info@be-safe.co.za](mailto:info@be-safe.co.za)
