

The Responder

“Progress Saves Lives...”

Edition 70 | August 2024

From the Editor's Desk

Greetings friends, clients and fellow healthcare professionals, welcome to the August edition of The Responder.

My goodness we have had some serious rain in Cape Town. The dams seem to have filled up nicely and if one thinks back to the days when we had a drought in Cape Town and all those awful water restrictions, the rain has been really welcomed. Having said that, I cannot help but feel a lot of empathy for the folks who live in informal settlements. Although the rain is desperately needed, it must make life really tough when you have flooded homes and streets to constantly contend with. Under the circumstances, I think the City of Cape Town have done a pretty decent job cleaning up and repairing potholes that popped up everywhere after the downpours. I am not quite sure we are over it yet as it is still a pretty hefty NE wind blowing, which is usually what brings the rain in Cape Town. I guess we will have to wait with baited breath.

We have had some great feedback on the last article we ran in July edition of The Responder on the i6 Pro Cardiac Monitor Defibrillator. There is however a small correction. The 12 Lead version with SpO2, NIBP, EtCO2 and Temperature will now be called the i6 Plus and not the i6 Pro. Irrespective of the name change, you can rest assured that you will be getting a lot of functionality for your money. I think right now there are very few Cardiac Monitor Defibrillators on the market that can offer you more than what the i6 Plus offers and at an extremely competitive price.

One of our veteran staff, Florence Jam-Jam retired at the end of July. Florence has been working for Be Safe Paramedical for over 22 years and was an integral part of our team at our Cape Town warehouse. Florence, you gave us 22 wonderful years of dedicated service and we will miss you. We hope you have a wonderful and restful retirement. Farewell and good luck.

On another exciting note, Be Safe Paramedical will be exhibiting at the Medic East Africa Medical Tradeshow from the 4 to the 6th of September 2024 in Nairobi, Kenya. This is the first time we will be exhibiting at Medic East Africa and it is a major milestone for us. We are able to do so through the kind support of the Department of Trade and Industry and Competition. If you are attending the show, we would love to have you visit our booth to see some of our latest products as well as some of our old favourites. We will be posting our booth number on our Social Media pages as soon as we receive it. We hope to see you there.

In this edition of The Responder, we will be taking a look at our new CritiCare® Universal EMS Shears. We believe it is a product that will help make your life a little easier out on the road and in time, we know you are going to be wondering how on earth you did without it all these years. Our stock is arriving soon, so to avoid disappointment, we suggest you purchase yours soonest.

As always, we have some great specials lined up for you, so you will definitely want to check them out for some great savings.

With that said, we hope you enjoy this edition of The Responder.

Yours in Healthcare

Gavin Sutton

Edition 70 | August 2024

New Product launch

CritiCare® Universal EMS Shears

Be Safe Paramedical are really excited to launch the CritiCare® Universal EMS Shears. EMS providers are going to find these to be a great addition to your jump bag or even to carry on your belt using the optional plastic holster. These multi-functional shears offer 6 different tools in one compact and durable design. Manufactured using high quality materials and designed to withstand the tough environmental conditions found on the road.

Let us take a closer look at the features on this useful little device.

- **Professional design** – Our EMS shears equipped with 6 essential tools including foldable shears, a strap cutter, a ring cutter, a 5cm ruler, an oxygen tank wrench, and a carbide glass breaker. In addition, it is equipped with a lanyard hole as well as a replaceable pocket clip, given you multiple storage options when not in use.
- **High Quality Materials** – Manufactured from 420HC Stainless Steel which makes the shears durable and able to withstand moisture and heavy use. Durable, fluoride coated non-stick surface with impact-resistant handles that will last for years.
- **6-in-1 Foldable EMS Shears with Replaceable Pocket Clip** - The multitool trauma scissors has a total length of 21cm. it is lightweight and compact, making it an excellent addition to your emergency kit or jump bag.
- **Lanyard Hole** - A hole designed in the body of the tool meant for attaching it safely and securely to a lanyard. Often people who work near water or on scaffolding attach their tool to a lanyard on their person to avoid losing the tool if it is dropped.
- **Replaceable Pocket Clip** - A replaceable clip which allows the user to wear their multi-tool attached to a pocket or belt loop without the need for a Holster.
- **Optional Holster** - If you prefer to store you CritiCare® Universal EMS Shears in the ready-to-use position, why not purchase the optional holster. Manufactured from high quality plastic and designed to snugly cradle your EMS Shears when not in use.

"Progress Saves Lives..."

Edition 70 | August 2024

Folding the CritiCare® Universal EMS Shears for storage is extremely easy to do and takes only two steps. If you however prefer storing your EMS Shears in the ready-for-use position, we recommend purchasing the optional purpose designed plastic Holster. The Holster can be easily attached to your belt and will ensure that you EMS Shears are always ready to use.

The CritiCare® Universal EMS Shears are available in black, red, orange, and blue and therefore meet most colour preferences.

Our EMS Shears are currently on order and we are expecting our stock to arrive around the 10th of August. Should you be interested in finding out more about these fantastic little shears or would like a quotation, please feel free to drop us a mail at info@be-safe.co.za
